5 a. **Public Hearing to Receive Comment on Proposed Amended Election District Ordinance**;

Dr. Tom Morris, Chairman of the Redistricting Committee, addressed the Board of Supervisors, and summarized the steps taken by the Redistricting Committee to formulate the recommended revisions to local election districts described in the proposed ordinance. He reminded the Board that review of election districts was required by the state constitution and state law to ensure approximately equal populations within election districts. Dr. Morris stated that the committee members focused on maintaining compact and contiguous election districts as required by law. In addition, he explained that the Committee worked with the goals to maintain current polling places and to avoid revision of boundary lines that would displace any of the members of the Board of Supervisors or of the School Board from their election districts. He stated that he was pleased to report that the Committee's recommendation was consistent with each of these goals and that the recommended revisions involve only minor changes to the current election districts.

Ms. Lucy Bright, County Attorney, advised the Board that all public notice requirements necessary for the Board's consideration and adoption of the ordinance had been met. She reported that, for the two-week period prior to this public hearing, maps showing the proposed revised election districts had been posted in the Courthouse, Registrar's Office and the County Administration Building. Public notice was published in local newspapers and copies of the proposed Ordinance had been available for public review. She explained that the election district review process is required by the state Constitution, which requires that the election districts be reviewed every ten years, based on the most recent census data, to provide as close as possible equal populations in each election district. In addition, she pointed out that state laws require the districts to be compact and contiguous.

Mr. Derting opened the public hearing to receive comments on proposed amended election district ordinance.

Patrick Mannix addressed the Board expressing his concern with whether the public notice requirements were met. [Ms. Bright answered that the statutory public notice requirements had been satisfied.] Mr. Mannix also commented that the proposed Election District G-01 did not appear to meet the compact and contiguous requirement of state law.

There being no further comments, Mr. Derting declared the public hearing closed.
