

To Contractors for Invitation for Bids for Demolition of Elliott Building:

The following questions were received from vendors. In order to keep everyone informed, here are the questions and answers:

1. In the Asbestos Technical Specifications, I see where the Owner is to hire the project monitor, but in section **3.03 B** it states that the contractor has to do **A.** work area environmental and **B.** personal breathing 8-hour TWA and excursion. Does that mean the contractor also has to have an on site lab to do area and final clearance sampling? **The County will hire a project monitor (HDH) to handle it.**
2. We currently have (1) addenda. Have you released any additional Addenda? **No.**
3. Can I get a copy of the updated planholder list? **There has been no update in the planholder list. See Exhibit 1 Attendee List for Pre-Bid Meeting that was issued with Questions & Answers #3 on 1/22/2021.**
