

To Vendors for Request for Proposal for EMS Billing and Revenue Recovery Services:

The following questions were received from vendors. In order to keep everyone informed, here are the questions and answers:

1. In a previous addendum it was stated the vendor will be responsible for software and hardware above what Virginia OEMS supplies as standard package. What are you expecting this to be?
ESO billing module
2. Would you like the vendor to supply the ESO subscription? **Yes**
3. What hardware are we required to supply? This will factor into our pricing. **Anything required above the laptops in the ambulances for billing.**
